Caspe has been a centre for fishing carp, catfish, zander and black bass for many years.

We are situated on a lake created by damming the River Ebro at Mequinenza.

We are situated half way down the lake which is 70 miles (100 km) long and varies from river to lake in width.

There are numerous companies offering different packages for fishing.

Here at Caspe Fishing we cater for anglers who want to arrange their own fishing.

Guides may be arranged with prior arrangement, but advise to newcomers is free.
